1. Purpose and Nature of the Request for Information (RFI)

The Department of National Defence (DND) is requesting Industry feedback regarding the procurement of fourteen (14) new Diesel Driven Fire Pumps (DDFP) for use by the Royal Canadian Navy (RCN) on the *Halifax-Class* Frigates. The DND is also requesting an option to procure twelve (12) additional DDFP's if necessary.

The objective of this RFI is to share the DND's requirement and seek feedback from Industry on potential options to meet the DND's needs. This is the first step of a procurement process and is intended to determine availability of goods, Industry capability to meet our technical requirements, and to provide sustainment solutions.

This RFI is neither a call for tender nor a Request for Proposal (RFP). No agreement or contract will be entered into based on this RFI. The issuance of this RFI is not to be considered in any way a commitment by the Government of Canada, nor as authority to potential respondents to undertake any work that could be charged to Canada. This RFI is not to be considered as a commitment to issue a subsequent solicitation or award contract(s) for the work described herein.

Although the information collected may be provided as commercial-in-confidence (and, if identified as such, will be treated accordingly by Canada), Canada may use the information to assist in drafting performance specifications (which are subject to change) and for budgetary purposes.

Respondents are encouraged to identify, in the information they share with Canada, any information that they feel is proprietary, third party or personal information. Please note that Canada may be obligated by law (e.g. in response to a request under the Access of Information and Privacy Act) to disclose proprietary or commercially-sensitive information concerning a respondent (for more information: <http://laws-lois.justice.gc.ca/eng/acts/a-1/>).

Respondents are asked to identify if their response, or any part of their response, is subject to the Controlled Goods Regulations.

Participation in this RFI is encouraged but is not mandatory. There will be no short-listing of potential suppliers for the purposes of undertaking any future work as a result of this RFI. Similarly, participation in this RFI is not a condition or prerequisite for the participation in any potential subsequent solicitation.

Respondents will not be reimbursed for any cost incurred by participating in this RFI.

The RFI closing date published herein is not the deadline for comments or input. Comments and input will be accepted any time up to the time when/if a follow-on solicitation is published.

2. Background Information

The existing Diesel Driven Fire Pumps (DDFP) configuration consists of a Deutz Motoren Werke Mannheim (MWM)D226 diesel engine driving a FF704121 INGERSOLL-RAND centrifugal pump. These components are installed directly onto a steel base which is mounted onto the ship's hull by means of four (4) resilient mounts.

The Deutz MWM D226 engines are obsolete.

3. Potential Work Scope

The DND intends to procure fourteen (14) DDFP, plus Spares, Packaging, and Support & Test Equipment (S&TE) for recommended first and second level maintenance enough to ensure maintenance of the engines for two years, and to allocate work responsibilities between Canada and the Contractor. In addition, DND is requesting an option to procure an additional twelve (12) DDFP.

The term "DDFP" includes the diesel engine and centrifugal pump solidly mounted onto a steel sub-base and connected to each other by a flexible coupling. It also includes any appendages mounted off the raft assembly such as control panels, motor starters, and freshwater expansion/header tanks, etc., that are intended to be fitted in the ship separately.

Installation of the DDFPs into the ships will be conducted by Canada either in a shipyard contracted by Canada during a contracted refit period or within one of His Majesty's Canadian (HMC) Dockyards.

4. Procurement Approach

The current plan is to solicit a competitive Solicitation of Offers on Canadabuy for design, testing, delivery and support. Basis of Payment - Milestones for deliverables will be considered, if applicable.

5. Technical

5.1 Mandatory Technical Requirements

- 1) Capacity 147 m³/h and total head 10 bar
- 2) Weight no more than 1,214 kg complete without fluids
- 3) Fit in the following dimensions:
 - a) Length 80 inches
 - b) Width 41 inches
 - c) Height 52 inches including the mounts
- 4) Duty Cycle: 100% load continuous load for 100 hours/year.
- 5) Must maintain rated output under the following conditions:
 - a) Roll: +/- 40° for a 10 second period (i.e. from 0° to starboard to 40° port and back to 0° within a 10 second period)
 - b) Pitch: +/- 10° within a 6 second period
 - c) Permanent list: +/- 20° max
 - d) Permanent trim: +/- 5° max
- 6) Must withstand and operate under the following ambient environments:
 - a) Fresh Air Supply
 - i) -32°C min (mandatory)
 - ii) -40°C min (desirable)
 - iii) +48°C max (mandatory)
 - b) Sea Temperature:
 - i) -2.2°C min; 35°C max
 - c) Relative Humidity
 - i) 0% min; 100% max
 - d) Machinery Space Temp
 - i) -2°C min; 57°C max
- 7) Fuel Type: standard Naval distillate fuel to Canadian General Standards Board CGSB-3.11-2017, with sulphur content of 15 ppm or less supplied by the existing Fuel Oil Services System
- 8) Engine Lubrication: 15W40 DEO-ULS CAT Oil
- 9) The DDFP to be installed will be lowered into the ships' spaces through the hatches that are 914mm x 914 mm large. The design must allow the possibility that the DDFP, including the base

- frame, be disassembled in components to pass through the hatches.
- 10) The contractor has the option to reuse the existing base frame for the new design.
- 11) The Contractor must provide the DDFP that meets the MIL-DTL-901E, for Grade A equipment - "Shock Test, H.I. (High-Impact) Shipboard Machinery, Equipment, and Systems, Requirements for", Detail Specification, Department of Defense, Washington, 142 pages, 20 June 2017.
- 12) The Contractor must provide the DDFP that meets the MIL-STD-167-1A, "Mechanical Vibration of Shipboard Equipment", Department of Defense Test Method Standard, 2 November 2005, 15 pages.

5.2 Design Changes and Modifications during contract

Any technical changes, substitutes and alternatives proposed by the winning bidder must be evaluated for acceptance by the Technical Authority (TA). Any substitutes and alternatives must be equivalent in form, fit, function, quality and performance to what is being replaced and must be at no additional cost to Canada. Substitutes and alternatives that are offered as equivalent will only be acceptable once they are approved by the TA as an equivalent. A contract amendment or a completed Design Change/Deviation form will be issued. Should the TA not accept the substitute or the alternative, and the winning bidder is unable to meet the technical requirement, Canada reserves the right to source the material elsewhere.

6. Certifications

ISO 9001 2015 – Quality management Systems (Q)

the Contractor must provide a Quality Management System (QMS) that conforms to ISO 9001:2015 Quality Management Systems – Requirements', or other internationally Accepted equivalent Standard as agreed by Canada.

Lloyds Registry

The Contractor must provide a DDFP engine with a Lloyd's Register (LR) Type approval Certificate and a LR Certificate for Oil Engines. The pump must be provided with a LR Certificate for Pumps.

7. Security Requirements

The security requirements will depend on the nature of the follow-on solicitation but is unlikely to have security requirements if the contractor will only be required to deliver goods.

8. Legislation, Trade Agreements, and Government Policies:

The following is indicative of some of the legislation, trade agreements and government policies that could impact any follow-on solicitation(s):

- Defence Production Act
- Canadian Free Trade Agreement (CFTA)
- World Trade Organization Agreement on Government Procurement (WTO)
- *Our North Strong And Free* (ONSAF)
- Federal Contractors Program for Employment Equity (FCP-EE)
- Buy Canadian Policy Suite
- *Security, Sovereignty and Prosperity* – Canada's Defence Industrial Strategy

9. Schedule.

In providing responses, the following schedule should be utilized as a baseline:

RFI Release – May 7 , 2026

RFI Response – June 12, 2026

Request for Proposal Release – August 2026

Contract Award – Fall 2026

10. Requested Information

Interested suppliers are requested to submit responses to Annex A – Requirement, Annex B – Industry Engagement Questionnaire and are encouraged to provide suggestions and recommendations to solutions to DND's requirements.

11. Buy Canadian Policy

The Government of Canada is strengthening opportunities for Canadian businesses in federal procurement through the following measures:

- [Buy Canadian Procurement Policy Framework.](#)
- [Policy on Prioritizing Canadian Materials in Federal Procurement.](#)
- [Policy on Prioritizing Canadian Suppliers and Canadian Content in Strategic Federal Procurement.](#)

These policies may apply to the subsequent RFP. Respondents are requested to submit information in response to the questions attached (Annex B) as engagement through this Request for Information (RFI) which will help determine the Buy Canadian Policy's application and how it could be applied to this procurement.

12. Enquiries

All enquiries and other communications related to this RFI must be directed exclusively to the Contracting Authority. All enquiries are to be submitted to the Contracting Authority no later than five (5) calendar days before the closing date. Enquiries received after that time may not be answered. Care shall be taken by vendors to explain each question in sufficient detail in order to enable Canada to

National Defence

Défense nationale

National Defence Headquarters
Ottawa, Ontario
K1A 0K2

Quartier général de la Défense nationale
Ottawa (Ontario)
K1A 0K2

provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that the vendor do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered with copies to all vendors. Enquiries not submitted in a form that can be distributed to all vendors may not be answered by Canada.

All pertinent Questions and Answers (Q&A) from written communication will be published on the Government Electronic Tendering System (Buy and Sell).

13. Contact

Interested Respondents may submit their responses to the DND Contracting Authority, identified below, preferably via email:

Name: Devin McClellan

Section: DGMEPM – D Mar P 9

Title: Senior Material Acquisition and Support, Team Lead

Address: Department of National Defence 101 Colonel by, Ottawa, Ontario, Canada

Telephone: (343-571-1916)

E-mail: devin.mcclellan@forces.gc.ca

A point of contact for the Respondent should be included in the package.

Changes to this RFI may occur and will be advertised on CanadaBuys. Canada asks Respondents to visit <https://canadabuys.canada.ca/en> regularly to check for changes, if any.

14. Closing date for the RFI

Responses to this RFI are to be submitted to the DND Contracting Authority identified above, on or before June 12, 2026.

15. Annex A – Requirement

The Contractor must ensure that the items delivered to Canada are accompanied by Certification of conformance from the Original Equipment Manufacturer (OEM) to meet Canada regulatory and assurance requirements.

15.1 Integration Requirements

The Contractor must design the DDFP into the Physical Envelope Requirements stated in section 5, and the Contractor must integrate the DDFP fully with the existing System Alarm, Monitoring, Control, and Safety Device signals.

The Contractor must develop and deliver an Interface Control Document (ICD) to ensure that interface management processes are in place to identify and control all external and internal interfaces. The Contractor must identify each interface and describe its purpose in the ICD.

The Contractor must include in the ICD installation specifications and directions which will form part of the Department of National Defence (DND) Engineering Change package. Canada may provide this specification to a third party involved in the installation.

15.2 Manuals

The Contractor must provide operating and maintenance manuals. The manuals must detail all maintenance activity and procedures for DDFP and component repairs, strip-down and overhaul.

The Contractor must provide parts manuals. The manuals must provide a complete breakdown of all DDFP component parts.

The contractor must provide a letter to provide the right to DND to share the manuals with a third party for the development of the preventive maintenance schedules and instructions.

15.3 Provisioning Documentation (PD)

Prior to producing or procuring Spares, Packaging, Support & Test Equipment (S&TE), or Training Devices, the Contractor must conduct the Provisioning Documentation.

The PD must include the following:

- the recommended Spares, Packaging (such as special-to-type Packaging), S&TE, and Training Device will Support the DDFP in the intended operational and Support environments at the operating rates in accordance with the System Requirements Document (SRD);
- the recommended range and quantity of Spares, Packaging, S&TE, and Training Device are in accordance with the SRD; and
- Spares, Packaging, S&TE, and Training Device analyses provide the justification to enable Canada to

Approve the S&TE and Training Devices.

The Contractor must provide the list of Spares, Packaging, and S&TE for recommended 1st and 2nd level maintenance for two years of operation.

15.4 Training

After delivery of the first DDFP, the Contractor must provide Training sessions for the DDFP on task-by-task basis.

Training sessions will be held in Halifax, NS or Victoria, BC.

15.5 Acceptance Testing

The Contractor must develop, deliver, and update an Acceptance Test Plan (ATP).

For delivery and acceptance of the first DDFP, the Contractor must include in the ATP a plan for the First Article Acceptance Test (FAAT), and a Final Inspection and Test (FI&T) for each subsequent DDFP

The Contractor must demonstrate that each DDFP offered for Acceptance complies with the Requirements of the Contract by the conduct of a:

- FAAT for the first DDFP in accordance with the Approved ATP; and
- FI&T for each subsequent DDFP, in accordance with the Approved ATP.

The Contractor must invite Canada or representatives appointed by Canada to witness the FAAT or FI&T activities for each DDFP offered for Acceptance.

15.6 Quality Management

At the Contract award, the Contractor must provide a Quality Management System (QMS) that conforms to ISO 9001:2015 'Quality Management Systems – Requirements', or other internationally Accepted equivalent Standard as agreed by Canada.

16. Annex B – Industry Engagement Questions

Instructions – Please answer as many questions as possible and you are encouraged to provide suggestions or industry standards if applicable.

Question 1

Is there industry capacity to design and deliver a DDFP to our specifications? We would consider envelope dimensions slightly larger than stated in paragraph 5. Please explain.

Question 2

Is industry capable of delivering a DDFP that is ISO 9001 certified?

Question 3

What is industries capacity to support the equipment in service: sustainment through technical support, repairs and overhaul? If yes, do you have repair facilities in Canada? Where?

Question 4

Can respondents provide Lloyd's Register (LR) Certification If not, can the respondent obtain LR certification?

Question 6

What would be the estimated design lead time? What would be the estimated manufacturing lead time?

Question 7

Is industry capable of meeting shock/vibration tested to the MIL standards for the proposed DDFP?

Question 8

Does Industry have the capability to modify an existing Commercial of the Shelf (COTS) DDFP to meet our requirements?

Question 9

Can you provide an estimated project schedule and delivery schedule?

National Defence

Défense nationale

National Defence Headquarters
Ottawa, Ontario
K1A 0K2

Quartier général de la Défense nationale
Ottawa (Ontario)
K1A 0K2

Question 10

Do you have experience in providing DDFP's of similar technical requirements for other ships. If so, provide details as to which you've manufactured, and/or designed.

17. Annex C – Definitions

In the Contract, unless the context otherwise requires, the following terms have the following meanings.

"Canada", "His Majesty" or "the Government" means His Majesty the King in right of Canada as represented by the Minister of Public Works and Government Services and any other person duly authorized to act on behalf of that minister or, if applicable, an appropriate minister to whom the Minister of Public Works and Government Services has delegated his or her powers, duties or functions and any other person duly authorized to act on behalf of that minister.

"Canadian Good" means: a good wholly manufactured or originating in Canada; or a product containing imported components that has undergone sufficient change in Canada in a manner that satisfies the definition specified under the Canada-United-States-Mexico Agreement (CUSMA) Rules of Origin. For the purposes of this definition, the reference to "territory of the Parties" in the CUSMA Rules of Origin is to be replaced with "Canada".

"Canadian Supplier" means: a supplier that has a place of business in Canada where it conducts activities on a permanent basis that is clearly identified by name and accessible during normal business hours; or, a joint venture where each member of the joint venture has a place of business in Canada where it conducts activities on a permanent basis that is clearly identified by name and accessible during normal business hours; and is registered and files taxes in Canada (e.g., GST/HST, corporate income tax); maintains a registered address in Canada and employs personnel and/or conducts day-to-day business activities in Canada; and will not subcontract work to non-Canadian suppliers or individuals located outside Canada, in a manner that results in minimal value-added activities being performed within Canada.

"Canadian Service" means a service wholly provided by (natural persons/individuals) based in Canada. Services include construction services.

"Canadian Value-Added" means:

-in relation to services, a Canadian Service or the proportion of the service contract performed by natural persons based in Canada; and

-in relation to goods, a Canadian Good or the value of the portion of the good produced in Canada or the difference between the dutiable value of the imported goods and the selling price, taking into account any value added by manufacturers and distributors, and including any costs incurred in Canada related to research and development, sales and marketing, communications and manuals, customization, modifications, installation, and support, warehousing, distribution, and logistics, training and after-sales service.

"Party" means Canada, the Contractor, or any other signatory to the Contract and **"Parties"** means all of them.

"Specifications" means the description of the essential, functional or technical requirements of the Work in the Contract, including the procedures for determining whether the requirements have been met.

"Work" means all the activities, services, goods, equipment, matters and things that the Contractor is required to do, deliver or perform under the Contract.

"Aluminum Smelted and Cast in Canada" means that:

- a) for all aluminum material except aluminum sheets and plates: the largest volume of primary aluminum contained in the material was produced in Canada; and
- b) for all aluminum sheets and plates: any percentage of primary aluminum contained in the material was produced in Canada.

Canadian Aluminum" means a) a product listed in the Annex Schedule of Materials - Canadian Aluminum; and b) fabricated from Aluminum Smelted and Cast in Canada.

National Defence

Défense nationale

National Defence Headquarters
Ottawa, Ontario
K1A 0K2

Quartier général de la Défense nationale
Ottawa (Ontario)
K1A 0K2

“Canadian Steel” means a) a product listed in the Annex Schedule of Materials - Canadian Steel; and b) fabricated from Steel Melted and Poured in Canada.

“Canadian Wood Products” means any wood product listed in Annex Schedule of Materials – Canadian Wood Products, and fabricated in Canada.

“Materials” means Canadian Steel, Canadian Wood Products, and Canadian Aluminum.

“Steel Melted and Poured in Canada” means the raw steel, or any portion of the raw steel, contained in the material first produced in a liquid state in a steel-making furnace and poured into its first solid state in Canada. Solid state can take the form of a semi-finished or finished steel mill product.
