

Request for Information – Hydrology (Stream 1) and Methylmercury Contamination and Water Quality (Stream 2)

I. Description

As per its [Terms of Reference](#), the Regional Assessment in the Ring of Fire Area is identifying key information gaps and research needs that could be undertaken to support the Regional Assessment and future impact assessments and decision making, either concurrently or as part of follow-up and monitoring work. Currently, the Regional Assessment Working Group is considering work that could support assessing how development and other stressors could impact hydrology (stream 1) and methylmercury contamination and water quality (stream 2) in the [regional assessment area](#).

II. Objectives

The objective of this Request for Information is to seek feedback on draft scopes of work. The information provided will help us better plan the time and budget required to complete this work and to understand the availability of subject matter experts.

In your feedback, please respond to the following questions:

- A. Would you be interested in bidding on any aspect(s) of the work identified for stream 1 (hydrology) and/or stream 2 (methylmercury contamination and water quality)? Please be clear about the aspects of this work you could or could not complete.
- B. Based on your expertise, are there any aspect(s) of the work identified for stream 1(hydrology) and/or stream 2 (methylmercury contamination and water quality) that could not be addressed due to lack of existing data and literature. Please explain.
- C. Based on your expertise, what tools (e.g., software) would be required to complete the tasks identified in streams 1 and 2. What tools would be nice to have but are not required. For example, could the tasks be completed without a GIS component or story maps.
- D.1 Are the timelines indicated in the draft scopes of work sufficient to address the tasks identified?
- D.2 Please break down the scopes and provide views on the minimum duration vs. ideal schedule for this work.
- E.1 If your company had to compete for consulting contracts in stream 1 (hydrology) how large would a contract need to be to achieve all aspects of work listed in the

draft scope of work? Note this value must include costs of any honorarium for community interviews.

- \$50K
 - \$100K max
 - \$150K max
 - \$250K max
- E.2 What parts of the draft scope could be achieved around \$100K max?
 - F.1 If your company had to compete for consulting contracts in stream 2 (methylmercury contamination and water quality) how large would a contract need to be to achieve all aspects of work listed in the draft scope of work?
 - \$50K
 - \$100K max
 - \$150K max
 - \$250K max
 - F.2 What parts of the draft scope could be completed around \$100K max?
 - G. Are there any additional work elements that should be considered for either stream?
 - H. Based on your expertise, what team composition would be ideal for stream 1(hydrology) and/or stream 2 (methylmercury contamination and water quality). Please explain.
 - I. What type of further information would you require to be able to put in a future bid for either stream?

III. Nature of the Request for Information

A RFI is used when detailed information and feedback are required from suppliers. Such requests might outline a potential requirement and request suppliers to describe their ability to satisfy the requirement and to provide ideas and suggestions on how the eventual solicitation might be structured. Responses are used to assist Canada in further developing plans for the requirement and in developing achievable objectives and deliverables.

This RFI is neither a call for tender nor a Request for Proposals (RFP). No agreement or contract will be entered into based on this RFI. The issuance of this RFI is not to be considered in any way a commitment by Canada, nor as authority to potential respondents to undertake any work that could be charged to Canada. This RFI is not to be considered as a commitment to issue a subsequent solicitation or award a contract(s) for the work described herein. As a result, potential suppliers of any goods or services described in this RFI should not reserve stock or facilities, nor allocate resources, as a result of any information contained in this RFI. This RFI is simply intended to solicit feedback from industry with respect to the matters described in this RFI.

Although the information collected may be provided as commercial-in-confidence (and, if identified as such, will be treated accordingly by Canada to the extent permitted by the Access to Information Act), Canada may use the information to assist in drafting Statement of Work or Evaluation Criteria (which are subject to change).

Participation in this RFI is encouraged but is not mandatory. There will be no short-listing of potential suppliers for the purpose of undertaking any future work as a result of this RFI. Similarly, participation in this RFI is not a condition or prerequisite for the participation in any potential subsequent solicitation.

IV. Response Costs

The Government of Canada will not reimburse any respondent expenses incurred by participating in this RFI.

V. Use of Response

Responses will not be formally evaluated. However, the responses received may be used by Canada to develop or modify future approaches for procuring environmental services. Canada will have the right to accept or reject any or all comments or suggestions received.

VI. Point of Contact

IAAC will not necessarily respond to enquiries in writing or by circulating answers to all potential suppliers as this is not a solicitation process. However, respondents with questions or feedback regarding this RFI may direct their enquiries to the Contracting Authority, via e-mail.

Name: Kimberly Martin

Title: A/Manager, Procurement & Contracting

VII. Confidentiality

Respondents are encouraged to identify, in the information they share with Canada, any information that they feel is proprietary, third party or personal information. Please note that Canada may be obligated by law (e.g. in response to a request under the Access of Information and Privacy Act) to disclose proprietary or commercially-sensitive information concerning a respondent (for more information: <http://laws-lois.justice.gc.ca/eng/acts/a-1/..>)
